

Edmundson Electrical Ltd Gender Pay Gap Reporting 2020

UK employers are required to report six key figures relating to their gender pay gap:

1. The mean hourly pay gap between men and women,
2. The median hourly pay gap between men and women,
3. The mean bonus pay gap between men and women,
4. The median bonus pay gap between men and women,
5. The proportion of men and women receiving bonus pay and
6. The distribution of men and women within pay band quartiles.

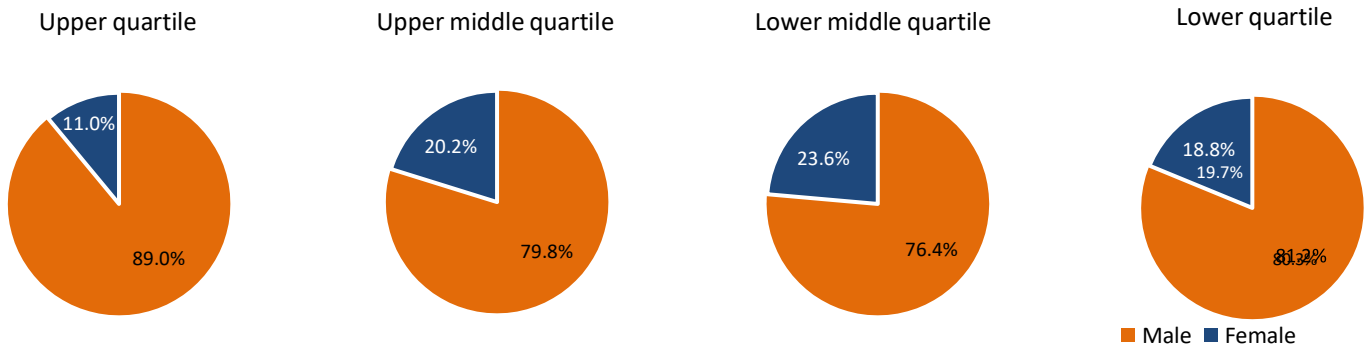

Gender pay versus equal pay

The gender pay gap shows the difference in the average pay between all men and women across a whole organisation. This is not the same as equal pay. Equal pay deals with pay differences between men and women who carry out the same jobs, similar jobs or work of equal value. The factors influencing the gender pay gap include the distribution of men and women between grades, experience, tenure and geographic location.

Gender pay gap at Edmundson Electrical Ltd

Mean pay gap	14.5%
Median pay gap	2.3%

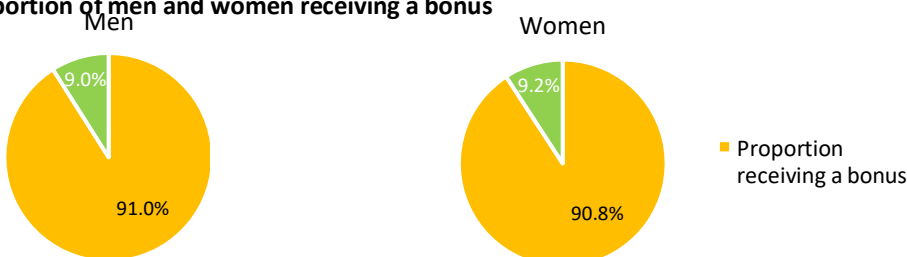

Pay band quartiles (proportion of men and women in each pay quartile)

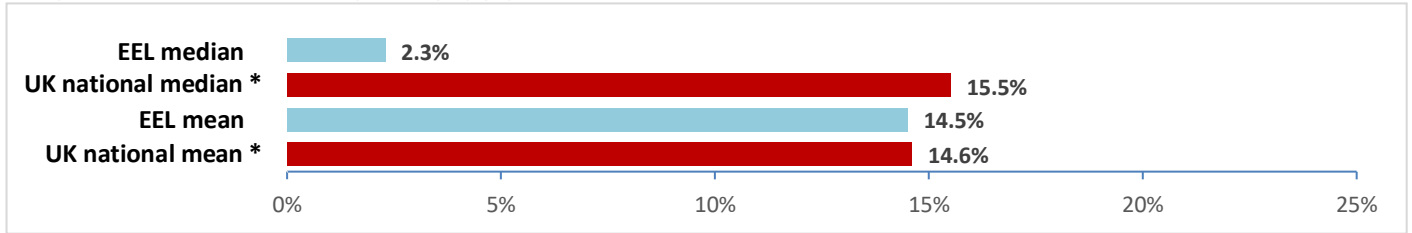

Gender bonus pay gap

Mean bonus pay gap	53.6%
Median bonus pay gap	30.6%

Proportion of men and women receiving a bonus

Comparison to the UK national gender pay gap

*Provided by the Office for National Statistics based on PAYE data for April 2020

The median and mean gender pay gaps at Edmundson Electrical Ltd are lower than the UK national median and mean gender pay gaps of 15.5% and 14.6%, respectively.

What impacts the pay and bonus gaps at Edmundson Electrical?

The main cause of our mean and median pay gaps in favour of men is the demographic profile of our workforce, which has a numerical under-representation of women across the business, including in the most senior roles. This is reflective of the distribution and construction sectors in general, which typically employ more men than women.

Our bonus pay gap is impacted by the relative seniority of men compared to women within Edmundson Electrical Ltd. Also, a higher proportion of women compared to men are in part-time roles and the bonus pay gap does not reflect the full-time equivalent bonus pay of part-time employees. While a very similar proportion of men and women receive a bonus, the seniority of employees and their working hours affect the amount of bonus awarded. We are confident that both the bonus eligibility criteria and the basis on which they are awarded are fair and non-discriminatory.

Edmundson Electrical Ltd is committed to providing equal opportunities at work regardless of gender.
